PROFESSIONAL PROFILE

Im a 17 Year old, from Melbourne, Australia, Growing up enjoying a heap of things, such as Cars, Computers, Business & Marketing, in my free time i like to create things, work on my bikes, learn new skills and hang around with mates, im keen on learning new things and am very open minded to new ideas, new friends and working with a duo, team or even sometimes solo.

I'm extremely keen on working long-term with someone on the computer & backend sort of things, such as support, website, marketing, ads and so on, but for now am looking for a part time job, in such as a warehouse and so on.

I'm pretty flexible when it comes to time, and am open to having an interview when suits both parties.

-

PERSONAL ACHIEVEMENTS

HDQTRS

Building/Built an immersive business management system, with my longtime friend from London, still in the works and planning to land a contract one day. (Currently working on <https://dashboard.hdqtrs.app>)

Game Servers

Built Multiple game servers (FiveM) That were extremely known and had a massive name within the Australian scene, had some big names and worked with big people within the scene, still talked about to this day, these servers also made money due to monetization for in-game items.

Etsy Storefronts

Owned (3) Etsy stores selling Digital Items for FiveM Server owners to utilise them selves, making upwards of \$350.00 a day each, sadly had to cut it short due to rules that didn't align within Australia :(

MORE ABOUT ME

I like to work on my bikes, alongside my friends bikes, and I contribute to them by helping them fix, build and work on their bikes, alongside doing modifications to them to improve power, and I really enjoy doing it, usually when I'm passionate about something I stick to it for quite awhile.
